

DYMACARE[®]

advanced protection

ADVANCED CONTINENCE CARE

An ideal all-in-one continence care solution to cleanse, soothe, moisturise & create a protective barrier.

Cleanses, refreshes & moisturises skin in one easy swipe

Allantoin to soothe and aid skin recovery

Dimethicone & Liquid Paraffin create an effective long lasting barrier

Organic Aloe Vera to calm, moisturise and aid healing

PERINEAL SKIN DAMAGE OCCURS IN UP TO 33% OF HOSPITALISED ADULTS^{1,2}

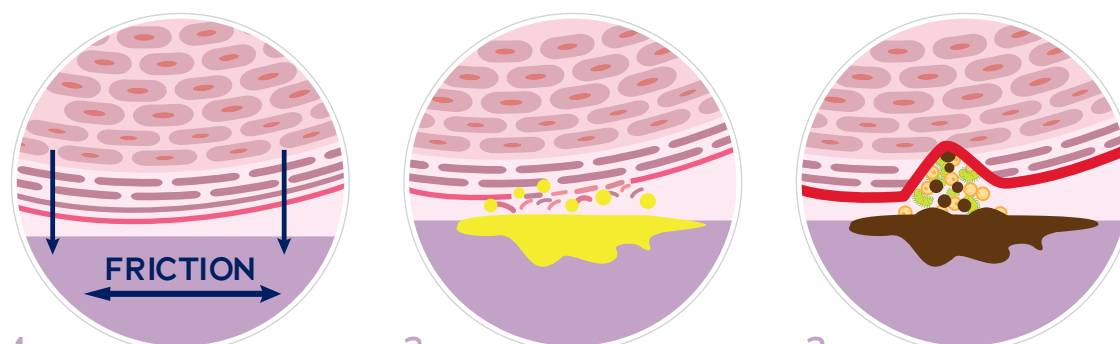

Incontinence drastically increases chances of skin Damage.

Incontinence Associated Dermatitis (IAD) is defined as "an inflammation of the skin that occurs when urine or stool comes into contact with perineal or peri genital skin."³

Skin damage from a pressure ulcer occurs from the inside out, but IAD starts from the surface and works inwards.

Research has shown, that perineal skin damage occurs in as many as 33% of hospitalised adults.^{1,2}

The odds of an incontinent patient developing a pressure ulcer is 37.5 times more, especially for patients with impaired mobility and faecal incontinence.⁴

1.

Immobilised patients' skin is pressed downwards which reduces blood flow. Friction increases skin breakage.

2.

The delicate pH balance of the skin is lost when wetted with urine, this weakens the natural barrier & permits skin damage.

3.

Faecal bacteria damage skin and it starts breaking up, letting the infection spread inwards over the short time.

BARRIER ELEMENT APPLICATION IS IMPORTANT.

Protecting incontinent patients' skin is as important as cleansing and moisturising. Failure to apply barrier cream could lead to Incontinence-Associated Dermatitis (IAD), known to be a risk factor for pressure ulcers. Studies have shown that 54% of incontinent patients suffered from IAD, while 21% had peri-skin injuries.⁵

IAD RISK FACTORS:

- Faecal incontinence
- Frequency of incontinence
- Compromised mobility
- Poor skin condition
- Poor skin oxygenation
- Moisture
- Alkaline pH
- Tissue tolerance impairments

ALL IN ONE SOLUTION FOR CONTINENCE CARE - DYMACARE® ADVANCED CONTINENCE CARE WASH MITTS AND WIPES:

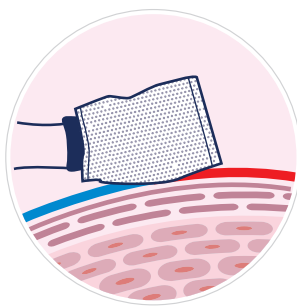

- Easy to use
- Eliminates need for water & rinsing
- Cleans, treats & protects in one step
- Soft, skin friendly cloths
- Creates protective barrier
- With soothing Aloe Vera and Allantoin

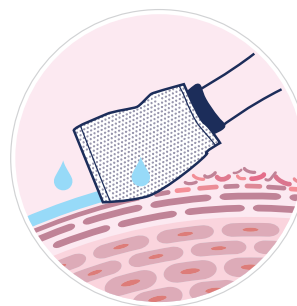

DYMACARE® CONTINENCE CARE WIPES AND MITTS CLEANSE, MOISTURISE & PROTECT THE SKIN AS WELL AS REMOVE THE INFECTION RISK OF CONTAMINATED BASINS.

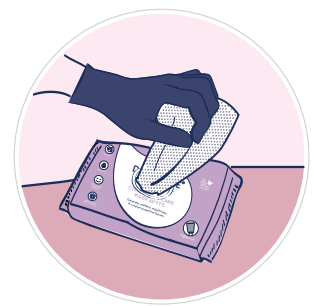

Quick & effective; odours are eliminated, water is not required, and the patient does not require transfer to bathing facilities.

Dymacare® wipes and mitts are soft and gentle on skin. Our all-in-one formula is pH balanced and dermatologically tested.

Dymacare® Advanced Continence Care products moisturise & impart a protective barrier on the patients' skin.

Each pack is individual for the patient, which reduces the risk of cross-contamination.

MANAGING MOISTURE WHEN TREATING AND PREVENTING PERINEAL DERMATITIS DUE TO INCONTINENCE

When fighting incontinence caused dermatitis it is very important to manage moisture. After soiling, clean incontinence episodes immediately to protect against skin damage. Now you do not need washbasins and a separate barrier cream. You can use our no-rinse, all-in-one continence care products to clean, moisturise & create a protective barrier.

Our convenient, easy to use mitts and wipes will help you standardize incontinence hygiene, save time and help you fight and prevent IAD.

KEY SKIN SOOTHING, PROTECTING & BARRIER FORMING INGREDIENTS IN OUR PRODUCT:

DIMETHICONE forms a permeable barrier that works to prevent moisture loss and impart a silky feel.

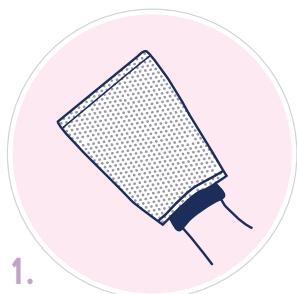

LIQUID PARAFFIN creates a thin lipid layer on the surface of the skin which prevents water loss.

ALLANTOIN is an active skin protector, it naturally encourages the skins healing process; It is considered to be an excellent anti-irritant as it calms and soothes inflamed skin.

ALOE VERA soothes and moisturises skin.

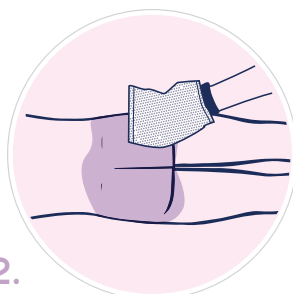

DIRECTIONS OF USE

Suitable for continence care and may be used regularly on patients with sensitive skin.

1.

Wash hands thoroughly and put on the gloves prior to using the product.

2.

Wipe perineum and buttocks cleaning all the areas with care. Allow skin to air dry and absorb soothing formula. Do not rinse off.

3.

Discard used wipes and gloves. Wash your hands.

INGREDIENTS

Aqua (Water), Paraffinum Liquidum, Dimethicone, Aloe Barbadensis (Aloe Vera) Leaf Gel, Glycerin, Allantoin, Phenoxyethanol, Sodium Polyacryloyldimethyl Taurate, Hydrogenated Polydecene, Sodium Benzoate, Caprylyl/Capryl Glucoside, Acetic Acid, Parfum.

CAUTION: For external use only. Avoid contact with eyes, mouth and bleeding skin. Discontinue use if irritation occurs. Read label before use. Keep out of reach of children.

STORE: In a cool, dry place. Keep away from extreme temperatures and direct sunlight.

DYMACARE® single-patient packs prevent cross-contamination and remove the risk of microbiological transmission associated with sharing packs and using wash basins. A creamy formula comforts the patient and provides barrier protection, reducing IAD in your healthcare facility.
